♦ *Eleventh Annual EU Report (CoEU, 2009)*.

Explanatory notes:

Note A: UN Comtrade data in this table was calculated using the Norwegian Initiative on Small Arms Transfers' reliability index (see Small Arms Survey, 2005, pp. 99–100, box 4.1; Marsh, 2005).

Note B: The cut-off date for inclusion of data from national arms export reports in this table is 31 December 2010.

Note C: Customs data and national arms export reports as well as the *EU Report* diverge for a number of reasons. Two important causes of discrepancies are: (a) unlike customs data, national arms export reports sometimes do not include exports of what is categorized as 'civilian' weapons and (b) many countries use the Wassenaar Arrangement Munitions List (ML) in their arms export reports. The categories of the ML, with one exception (ML1), do not distinguish small arms and light weapons from other types of weapons. The Small Arms Survey records the ML1 value in the table; hence, many types of small arms and light weapons and all types of small arms ammunition are excluded (Small Arms Survey, 2005, pp. 101–02).

Note D: In this table, 'transfer' can also mean the movement of small arms for repair, and the devolution of parts and weapons to licensing companies (see Small Arms Survey, 2009, p. 9).

Note E: Top exporters (those with an annual export value equal to or greater than USD 100 million, according to UN Comtrade and estimates) are set in bold.

Note F: UN Comtrade figures exclude a variety of weapon types and ammunition, such as man-portable missiles; as a result, the actual figures for some countries are probably underestimates.

Explanatory notes:

Note A: UN Comtrade data in this table was calculated using the Norwegian Initiative on Small Arms Transfers' reliability index (see small Arms Survey, 2005, pp. 99–100, box 4.1; Marsh, 2005).

Note B: The cut-off date for inclusion of data from national arms import reports in this table is 31 December 2010.

Note C: In this table, 'import' can also mean the movement of small arms for repair, and the devolution of parts and weapons to licensing companies.

Note D: Top importers (those with an annual import value equal to or greater than USD 100 million, according to UN Comtrade and estimates) are set in bold.

Note E: UN Comtrade figures exclude a variety of weapon types and ammunition, such as man-portable missiles; as a result, the actual figures for some countries are probably underestimates.
